RE: NASA's Life and Work on the Moon Contest **Artist Statement**

Enabling Exploration

Our entry seeks to explore the opportunities and difficulties in creating a **lunar health habitat** to enable a sustained human presence on the moon. The depicted health habitat will support life and work carried out on the moon by astronauts, scientists, and lunar pioneers. Supporting human life remote from Earth presents many challenges as it requires the integration of innumerable considerations. However, success in this venture offers limitless potential to return unimaginable rewards. We endeavor to lend the perspective of humanistic design in support of the physiological and psychological well-being of our future lunar citizens, to supplement the accomplishments of science and engineering that we rely upon as a foundation.

Thank you for the opportunity to contribute to this ambitious vision.

Lann Brumlik and Corey DiRutigliano
